Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Applicant submitted a new IDS (JP-A-8-20640) for consideration after allowance. Examiner notes that IDS is substantially different than dependent claim, where the liquid absorbing sheet contains a phosphate-based liquid flame retardant is bisphenol A bis(diphenyl)phosphate, hydroquinol bis(diphenyl)phosphate, phenyl dixylenyl phosphate, tricresyl phosphate, cresyl diphenyl phosphate, trixylenyl phosphate, xylenyl diphenyl phosphate, resorcinol bis(diphenyl)phosphate, or 2-ethylhexyl diphenyl phosphate and the phosphate-based liquid flame retardant is present in the monomer composition in an amount of 70 to 200 parts by weight with respect to 100 parts by weight of the monofunctional monomer component and the polyfunctional monomer component combined. Where the new IDS (JP-A-8-20640 submitted is a water absorbing polydioxorane with crosslinking agent bearing a polyfunctional group reactive with an OH group within the polydioxorane molecule.
